

NANJING SCOVICON Industry & Information Technology Service Co., Ltd.

YOUR GERMAN SERVICE IN CHINA

Our Services

1. Site Selection

- Location selection and comparison
- Micro and Macro location analyses
- Investigate promotional, incentive and controlling austerity program
- organization of visits of potential locations

To choose a right location is extremely important for your business success. Our explicit micro- and macro location analyses will assist you to make an excellent choice for your expansion.

2. Site Installation

- Project management / project coordination of building and relocation projects
- Disassembly and installation of facilities
- Installation and commissioning of the new facilities
- Site internal machine relocation

If you need to replace the facility on site, you should well plan and carry out the moving and commissioning carefully. As the facilities and the equipment's are normally sensitive, highly priced and easily to be destroyed, it's of high importance to hand over the valuable machines and facilities to a reliable partner without doubts. We're able to undertake the project- responsibility and coordination for your production- or machine relocation at your Chinese site. You could consult us for the reference project.

3. Site Startup

- Startup support in the branch of production such as cutting, reshaping, molding, assembling and quality assurance
- Fast-Response solutions
- Implementation of the training and re-qualification

We offer you the startup support in different branches and industrial manufacture. Critical project stage cannot be overcome without fast response time, experiences, analytical thinking and effective communication. We have the professional competence, speak German and last but not least, we're directly available at the site in China for you.

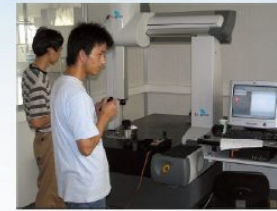

4. Site Optimization

- Profitability analysis
- Process analysis
- Process modelling
- Process optimization
- Process implementation

Our well-rehearsed team specialized in analyzing the weak points and potential in the operational process. The process would be analyzed without bias and neutrally, as we have a different point of view with the daily affair. We define the act of improving and present the optimizing solutions. Please contact us – we would support you with great pleasure.

5. Quality Assurance Solution

- QA Process implementation
- Stabilization and optimization of the process
- Machine-, device- and process capability inspection
- Supplier assessment
- Quality control of the supplier
- Quality inspection before the delivery

We're your dependable partner when you face the challenges in the local field of quality management in China. You could benefit from our longstanding practical experiences in production process, which means your process would be analyzed promptly and exactly. We would find out the weak points, offer you the suggestions for improvement and be willing to work with you to put that into practice.

6. IT Solution

- Analysis, planning and implementation of IT infrastructure
- ERP project management
- Draw up and transfer of IT- security concept
- Risk assessment and emergency planning
- System- and user management

Our experience and competence stretch from the implementation of complex IT infrastructure to the adoption of ERP-System. German and China have different understanding of IT security. We'll show you what risks your company would confront in China and which IT- security measures should be taken to prevent this successfully.

7. Emergency Solution

- Interim management
- Emergency repair
- Disaster recovery
- Preparation of emergency concept
- Prepare emergency handbook and recovery plan

We lay down the emergency and recovery plan for our client to ensure that their company could survive in the event of disasters. With the appropriate emergency and contingency plans you could prepare adequately for such events. Scovicon would help to draw up your company specific emergency and contingency plan.
